

Mountings

Top plate

By far the most common fixing type is the top plate, with four bolt holes to spread the load over the swivel head, these come in a choice of swivel, swivel braked & fixed options.

Single bolt hole

Limited to loads of up to 500kg having a fastener through the centre of the swivel head, these come in a choice of Swivel, swivel braked & fixed* (*only in the BZRA & BZM ranges)
